## Profile

Leo is an aspiring software developer currently at the start of his career, possessing a strong drive to learn and develop his professional skills. He has gained practical experience working on personal projects using Python and JavaScript, and he derives satisfaction from solving complex technical problems. Recently, Leo contributed to a school project for the Tredu library, helping to create a website that utilized a MySQL database connected to a PHP frontend.

In addition to his core competencies in Python, JavaScript, HTML/CSS, C#, and Git, Leo offers a solid background in customer service gained from various service sector roles. This experience has fostered his ability to make quick decisions, work effectively in fast-paced environments, and collaborate seamlessly within a team. Leo is currently seeking a position within a team where he can apply his current skills and continue his growth as a programmer.

### Profile in brief:

#### Versatile Tech Stack

- Possesses core competencies in Python, JavaScript, HTML/CSS, C#, and Git

#### Professional Adaptability & Teamwork

- Leverages a solid background in the service sector to excel in fast-paced environments, demonstrating the ability to collaborate seamlessly within teams and make quick, effective decisions.

#### Commitment to Continuous Learning

- Dedicated learner with a genuine enthusiasm for tackling complex challenges. Actively seeking opportunities to apply evolving own skills and contribute to team success while continuing to learn.

## Professional Career

### Facilities Maintenance & Sanitation Worker (2025)

- Taking ownership in client facilities and office space sanitation activities and cleaning responsibilities.

### Bar Worker (2019 – 2020)

- Responsibility for the operational point and scheduling breaks for team members. Customer service in Finnish and English.
